DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 1-23 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. As per the most recent interpretation of the Interim Guidelines regarding 35 U.S.C. 101, claims 1-23 define non-statutory processes because they merely manipulate an abstract idea (manipulation of data information) without a claimed limitation to a practical application. If the acts of a claimed process manipulate only numbers, abstract concepts or ideas, or signals representing any of the foregoing, the acts are not being applied to appropriate subject matter (Benson, 409 U.S. at 71-72, 175, USPQ at 676). Furthermore, claims define nonstatutory processes if they simply manipulate abstract ideas (Warmerdam, 33 F.3d at 1360, 31 USPQ2d at 1759). Lastly, in evaluating claims in view of 35 U.S.C. 101, the "limited to the technological arts" test is no longer valid (see Annex III of the Interim Guidelines).

Allowable Subject Matter

3. Claims 1-23 are allowable over the prior art of record.

Art Unit: 2626

4. The following is a statement of reasons for the indication of allowable subject matter:

As per claims 1-23, the claim limitations pertaining to the selection of a subset of characters for pronunciation choosing/selecting/changing by the user is not explicitly taught by the prior art of record.

With respect to the prior art of record, it is old and well known to allow a user to choose pronunciations. For example, Huang et al (5933804) teaches allowing the user to change the pronunciation of words (Fig. 5a, 5b, and 5c); however, Huang et al does not detail the user to choose a subset of characters for pronunciation purposes (Huang allows the user to change/alter the pronunciation of words). Blackmer (5393236) does not teach a person teaching software the pronunciation of letter groups or words but software for teaching a person the correct pronunciation of words in a given language.

Response to Arguments

5. Applicant's arguments filed 11/22/06 have been fully considered but are moot in view of the new grounds of rejection.
